THE ENERSAVE RANGE OF LED DOWNLIGHTS ARE DESIGNED FOR BOTH RETROFITS AND NEW INSTALLATIONS.

THE ENS9 IS A DIRECT COST EFFECTIVE REPLACEMENT FOR EXISTING FIXED LOW VOLTAGE DOWNLIGHTS WHERE DIMMING IS NOT REQUIRED.

IF DIMMING IS NEEDED THEN THE ENS13 AND ENS18 ARE DESIGNED TO REPLACE FIXED DOWNLIGHTS AND GIMBALS RESPECTIVELY.

THEY ARE DIMMABLE WITH TRAILING AND UNIVERSAL DIMMERS.

THE LARGE FLANGE ON THE ENS18 ALSO MAKES IT SUITABLE TO REPLACE OLD STYLE 4 INCH DOWNLIGHTS OR TO HIDE THOSE UNSIGHTLY CRACKS IN THE PLASTER CAUSED BY LOW VOLTAGE FITTINGS.

THE COB LED CHIPS USED IN THE ENS13 AND ENS18 CREATE A HIGH LUMEN OUTPUT IN A SMALL PACKAGE.

ALL ENERSAVE PRODUCTS ARE SAA APPROVED.
